FULL-STACK DEVELOPER

PROFESSIONAL SUMMARY

Self-taught Full-Stack Developer with 3+ years of hands-on experience building backend applications using Node.js and Express.js, and 2+ years of experience developing modern frontend applications with React.js and Next.js. Skilled in designing, developing, deploying, and maintaining full-stack web applications from concept to production.

Experienced in REST API development, authentication and authorization, database design, state management, cloud deployment, Linux server administration, and scalable application architecture. Delivered freelance projects and independently built production-ready applications using modern JavaScript technologies. Passionate about software engineering, continuous learning, and building reliable, user-focused digital products.

TECHNICAL SKILLS

Frontend

React.js, Next.js, Redux Toolkit, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Bootstrap

Backend

Node.js, Express.js, REST APIs, JWT Authentication, MVC, Clean Architecture

Databases

MongoDB, MySQL, Redis

Cloud & DevOps

AWS EC2, PM2, Nginx, Linux, CI/CD, Vercel

CMS

Strapi

Tools

Git, GitHub, Postman, Firebase, MongoDB Atlas

PROJECTS

E-Commerce Platform | Full-Stack Developer

Technologies: Node.js, Express.js, MongoDB, EJS, Razorpay, HTML, CSS

- Designed and developed a complete e-commerce application supporting product catalog management, shopping cart functionality, secure checkout, and order processing.
- Integrated Razorpay payment gateway for secure online transactions.
- Implemented JWT-based authentication and role-based authorization.
- Built administrative modules for managing products, categories, orders, and users.
- Developed RESTful APIs and optimized database operations for improved performance.
- Created responsive interfaces supporting desktop and mobile devices.

Doctor Consultation Platform (Ongoing) | Full-Stack Developer

Technologies: Next.js, React.js, Redux Toolkit, TypeScript, Node.js, Express.js, MongoDB, Tailwind CSS

- Developing a healthcare platform connecting doctors and patients through digital consultation services.
- Built secure authentication, onboarding workflows, and role-based access management.
- Developed doctor profile management and appointment scheduling systems.
- Implementing real-time communication features including chat and video consultation functionality.
- Integrating AI-powered assistance for appointment management and healthcare support.
- Following scalable application architecture and modern development practices.

Backend Repository: <https://github.com/Adnan-Muhammed/zydoc-backend>

User Management System | Full-Stack Developer

Technologies: React.js, Redux Toolkit, Node.js, Express.js, MongoDB, JWT

- Developed a secure user management platform with authentication and authorization.
 - Implemented registration, login, profile management, and protected routes.
 - Built role-based access control mechanisms for secure user management.
 - Developed administrative functionality for managing users, permissions, and roles.
 - Utilized Redux Toolkit for efficient state management and application scalability.
-

FREELANCE EXPERIENCE

Frontend Developer

- Delivered custom frontend websites and web interfaces for business clients based on project requirements.
 - Built responsive frontend solutions using Next.js, TypeScript, and Tailwind CSS.
 - Developed and deployed projects on Netlify and Vercel.
 - Implemented reusable components, responsive layouts, and client-side interactions.
 - Collaborated directly with clients to gather requirements, refine UI/UX, and deliver projects successfully.
 - Managed source code and version control workflows using Git and GitHub.
-

EDUCATION

Bachelor of Arts (BA)

Kerala University
Graduated: 2022

ADDITIONAL INFORMATION

- 3+ years of hands-on experience building backend applications using Node.js and Express.js.
- 2+ years of experience developing applications using React.js and Next.js.
- Experience building and deploying full-stack applications from development to production.

- Strong understanding of REST API design, authentication, authorization, database design, and state management.
- Experience with AWS EC2 deployments, Linux server management, PM2 process management, and Nginx configuration.
- Comfortable working independently, learning new technologies quickly, and solving real-world business problems.
- Open to Software Development Intern, Full Stack Developer Intern, Software Engineer Trainee, Junior Full-Stack Developer, and Software Developer opportunities.
