PROFILE

Versatile Full-Stack Developer with hands-on experience building scalable web applications through internship and freelance projects. Specializes in the MERN stack (MongoDB, Express.js, React, Node.js) with strong front-end focus on React.js and Next.js, building responsive, high-performance interfaces backed by robust, secure APIs. Passionate about clean, maintainable code and continuous learning. Currently seeking opportunities as a React / Full Stack Developer, contributing to impactful projects while continuing to grow technically. Immediate joiner, open to relocation.

TECHNICAL SKILLS

Front-end: React.js, Next.js, Redux, JavaScript (ES6+), HTML5, CSS3, TailwindCSS, Responsive Web Design

Back-end: Node.js, Express.js, RESTful API Design, JWT, MVC Architecture

Databases: MongoDB, MySQL, PostgreSQL, Redis, Schema Optimization

Tools & DevOps: GitHub, Postman, CI/CD, Vercel, AWS, Docker, Linux

Languages: Arabic (Professional Working), English (Professional Working), Malayalam (Native/Bilingual), Tamil (Limited Working)

EXPERIENCE

Freelance Web Developer | Self-Employed | Thiruvananthapuram

November 2024 - Present

- Architect and develop custom web applications using the MERN stack, tailoring solutions to specific client requirements.
- Implement responsive front-end interfaces and robust back-end systems, ensuring high performance and security.
- Manage full project lifecycles, from requirement gathering to deployment and maintenance.

MERN Stack Developer Intern | Brototype | Thiruvananthapuram

June 2023 - November 2024

- Gained hands-on experience building full-stack web applications using React, Node.js, Express, and MongoDB.
- Collaborated in an agile environment to develop and deploy scalable features, focusing on clean code and best practices.
- Debugged and optimized application performance, enhancing user experience and system reliability.

PROJECTS

E-Commerce Website (fully featured)

- Developed a complete online marketplace with product browsing, cart management, and secure checkout.
- Integrated Razorpay for payments and built a custom admin dashboard for product and order management.
- Implemented user authentication, product categories, and order tracking.

Tech Stack: Node.js, Express, EJS, MongoDB, HTML, CSS, Razorpay, Nodemailer, Multer

Doctor Consultation App (Online & Offline) — In Progress

- Developed role-specific onboarding with separate signup/login for Doctor, Patient, and Admin using Next.js cookie-based session management.
- Building appointment scheduling, doctor availability management, and patient health records with secure role-based access control.
- Building real-time video call and text messaging features for seamless telehealth consultations.
- Integrating an AI-powered chatbot for symptom guidance and appointment support using modern AI APIs.

Tech Stack: Next.js, React, Redux, Tailwind CSS, Google OAuth, Node.js, Express, MongoDB, Nodemailer, Multer

User Management System

- Built a role-based user management system with login, registration, and profile update functionality.
- Developed admin controls for managing users, roles, and permissions, with secure authentication using JWT and protected routes.

Tech Stack: React, Redux, Node.js, MongoDB, JWT

EDUCATION

Bachelor of Arts, Arabic Language and Literature

University of Kerala | 2022
