PROFILE

Versatile Developer with hands-on experience in building scalable web applications. Proficient in both frontend and backend technologies, including Node.js, Express.js, Next.js, and React. Skilled in database management, RESTful API design, and creating seamless user experiences. Passionate about writing clean, maintainable code and solving complex technical challenges to deliver robust software solutions.

TECHNICAL SKILLS

Back-end Development: Node.js, Express.js, RESTful API Design, JWT, MVC Architecture

Databases: MongoDB, MySQL, PostgreSQL, Redis, Schema Optimization

Front-end Development: React, Next.js, Redux, HTML5, CSS3, JavaScript (ES6+), TailwindCSS

Tools & DevOps: GitHub, Postman, CI/CD, Vercel, AWS, Docker, Linux

EXPERIENCE

Freelance Web Developer | Self-Employed | Thiruvananthapuram | November 2024 - Present

- Architect and develop custom web applications using MERN stack, tailoring solutions to specific client requirements.
- Implement responsive front-end interfaces and robust back-end systems, ensuring high performance and security.
- Manage full project lifecycles, from requirement gathering to deployment and maintenance.

MERN Stack Developer Intern | Brototype | Thiruvananthapuram | June 2023 - November 2024

- Gained hands-on experience building full-stack web applications using React, Node.js, Express, and MongoDB.

- Collaborated in an agile environment to develop and deploy scalable features, focusing on clean code and best practices.
- Debugged and optimized application performance, enhancing user experience and system reliability.

PROJECTS

E-commerce Website (fully featured)

- Developed a complete online marketplace with features like product browsing, cart management, and secure checkout.
- Integrated Razorpay for payment gateway and created a custom admin dashboard for product and order management.
- Implemented user authentication, product categories, and order tracking features.

Tech Stack: Node.js, Express, EJS, MongoDB, HTML, CSS, Razorpay, Nodemailer, Multer

[GitHub Repository](#)

Doctor Consultation App (Online & Offline) (In Progress)

- Developed role-specific onboarding with separate signup/login for Doctor, Patient, and Admin using Next.js cookie-based session management.
- Building appointment scheduling, doctor availability management, and patient health records with secure role-based access control.
- Building real-time video call and text messaging features to enable seamless telehealth consultations between doctors and patients.
- Integrating AI-powered chatbot assistance for symptom guidance and appointment support using modern AI APIs. **Tech Stack:** Next.js, React, Redux, Tailwind CSS, GoogleOAuth, Node.js, Express, MongoDB, CSS, Nodemailer, Multer

[Frontend Repository](#)

[Backend Repository](#)

User Management System

- Built a role-based user management system with login, registration, and profile update functionalities.
- Developed admin controls for managing users, roles, and permissions, focusing on secure authentication using JWT and protected routes.

Tech Stack: React, Redux, Node.js, MongoDB, JWT
