MERN Stack Developer | Software Engineer | React.js | Next.js | Node.js | Express.js | MongoDB | JavaScript | REST APIs | SQL | Arabic Speaker | Immediate Joiner | Open to Work

Trivandrum, Kerala, India

Summary

Hi, I'm Adnan Muhammed, a Full Stack Developer with hands-on experience through internship and freelance projects. I specialize in the MERN Stack (MongoDB, Express.js, React, and Node.js) and enjoy building responsive, scalable web applications with clean, maintainable code. My experience has helped me strengthen my frontend, backend, database, and API development skills while learning how to work on real-world projects and collaborate effectively. I'm currently seeking opportunities as a Junior Full Stack Developer or Software Developer, where I can contribute, continue learning from experienced engineers, and grow as a developer. Let's connect if you're hiring or working on exciting products—I'd love to be part of the journey.
